

Representative Project List

Many of the listed public and commercial projects involved design of parking lots, walks, walls, and steps, streetscapes, entries and signage, parks, plazas and common areas. Some also involved noise and light mitigation, hike/bike trails, playground and recreation centers, ball fields, historic assessment and renovation, as well as written and illustrated design and maintenance guidelines. Land Mark Design was often part of a team to provide master planning in addition to detailed design for larger projects.
